Security and Access Control

- Remote Door control;
- Intrusions Detection;
- Smoke/ Fire Detection;
- Flood detection;
- Alarms and Triggers;
- Log & Reports;
- Wireless communication.

Energy Efficiency

- Reduce energy consumption and contracted power;
- Automatic delay consumption of non-essential electric equipments;
- Batteries status management;
- Renewable energy production and energy generators management;
- Temperature and Humidity control;
- Electric circuits, Light circuits and HVAC control during and after service hours.

How Can We Help

Measure Anything

KNX Server enables you to precisely measure the consumption of any device.

Predefined Measurement Units are W, kWh, V, A, %, VA, kVAh, VAR, kVArh, cosφ, Hz, L, m3, m3/h, °C, lux, tanφ, unit.

Need additional measurement units?

Talk to us.

Control Everything

Control your equipments using options such as RGB, Percent, On/ Off, Set Points, Timers, and others.

On Top Of Your Business

Get notifications for every relevant event as, for example, under or over specific measurement values.

Automate Your Daily Routines

Establish Rules to control your devices.

You can schedule actions, or create system automations based on readings from other devices.

Powerful Reporting

Create activity reports for each device individually or by combination of various circuits and criteria.

Build custom reports by selecting which devices to analyze for a given time period.

Compare different devices, or device combinations and evaluate the efficiency of your system.
